

MinTech's Synplicity dust suppression products utilize unique Gas-To-Liquid technology to provide petroleum-free solutions for your dust suppression needs.

To learn more about the GTL process, visit www.momar.com/synplicity

FULL-SYNTHETIC PROVIDING YOU SUPERIOR PERFORMANCE

Synplicity products contain none of the impurities found in crude oil, such as VOCs, metals, and aromatics

ECONOMICAL LOWERING YOUR COST OF OWNERSHIP VERSUS CONVENTIONAL NON-SYNTHETICS

Synplicity products are safer on equipment, and adhere to dust fines at the molecular level, extending the duration of dust control

VERSATILE ENABLING YOU TO CONSOLIDATE SUPPLIERS AND INVENTORY

Synplicity products are multi-functional, allowing you to use one product for a wide variety of dust suppression applications: road dust, process dust, in-transit dust, pile dust, etc.

Synplicity products are designed for industrial-grade applications, and can be used in food-grade applications as well because they comply with USDA H1 and FDA Title 21, Part 178.3570 and Part 172.878

ENVIRONMENTALLY RESPONSIBLE HELPING YOU PROTECT HUMAN HEALTH, THE ENVIRONMENT, AND EQUIPMENT

Petroleum-free • Leave no sheen on water
Non-flammable • Biodegradable • VOC-free
Metal-free • Non-corrosive • Food-grade
Allergen free • Non-conductive up to 34,040 volts

DUSTNOT™ SYN ULTRA-PURE, FOOD-GRADE DUST SUPPRESSANT LIQUID

- Non-evaporative, non-leaching
- No dilution, mixing, or heating required
- Controls fugitive dust emission up to 98%
- Compatible with any equipment capable of spraying waxes, oils, or water

AVAILABLE IN HIGH VISCOSITY FORMULATION FOR HIGH TEMPERATURE OPERATIONS **DUSTNOT™ SYN HEAVY**

Ask us about our other coating chemistries such as anti-caking agents and wax encapsulants.

Full Service Turn-Key Material Handling Service Provider

Ensure your facility's safety, compliance, and efficiency with our custom-designed programs and services for process applications, surface applications, and specialty chemical treatments.

SERVICES

PROCESS DUST CONTROL:

bunkers and silos, stackout and reclaim, conveyors and chutes, crushing and shredding, etc.

SURFACE DUST CONTROL:

roads, piles, slopes, yards, pads, and ash ponds

IN-TRANSIT APPLICATIONS:

truck, rail, and barge loading/unloading and toppers

SEASONAL OPERATIONS:

freeze conditioning agents, side release agents, flow aids, and de-icers

INDUSTRIAL CLEANING:

low moisture foam cleaning and automated wash down systems

FIRE PREVENTION AND CONTROL:

combustible dust control and spontaneous combustion inhibitors

ENVIRONMENTAL MATTERS:

erosion prevention and emission control
