PRECAUCION:
 AL USUARIO: Si usted no lee Inglés, no use este producto hasta que la etiqueta le haya sido explicada ampliamente.
 (TO THE USER: If you cannot read English, do not use this product until the label has been fully explained to you.)

APPLICATIONS & DIRECTIONS

CRACK & CREVICE TREATMENT: Adjust spray nozzle for stream application. Apply product into hiding places such as cracks and crevices behind sinks, drawers, cabinets, shelves, bookcases, and stationary equipment, contacting insects directly when possible.

DRAIN FLY TREATMENT: Adjust spray nozzle for a coarse spray and apply product in and around drain openings, grates, and access points, contacting insects directly when possible. Repeat treatment monthly or as needed.

PERIMETER & BASEBOARD TREATMENT: Adjust spray nozzle for a coarse spray and apply product to baseboards, thresholds, door jams, window seals, and other entry points monthly or as needed.

ANTS: Adjust spray nozzle for a fine mist and spray trails, nests, mounds, and points of entry. Spray directly onto ants when possible. Repeat as necessary.

DUST MITES: Adjust spray nozzle for a fine mist and apply as a space spray. Hold container 36-48 inches above floor and direct spray toward floor and lower walls at a rate of 3 full sprays per square yard. Make sure that all floors, chairs, curtains, and rugs are contacted. Keep area closed for 15 minutes while product dries. Repeat treatment monthly or when desired.

BEDBUGS: Adjust spray nozzle to a coarse mist, hold the container 8-10 inches from the surface, and apply as a space spray to those garments and parts of bedding, including mattresses and furniture, that cannot be either laundered or dry cleaned.

SPACE SPRAYING: Using a misting or cold-fogging machines, apply Thyme Bomb indoors or outdoors for rapid control of crawling insects. Distribute product uniformly throughout the entire area at a rate of ½-1 ounce per 100 square feet.

OUTDOOR USES: Apply to waste receptacles, outdoor furniture, and seating areas to repel insects from the area. Spraying the legs of tables and chairs will repel ants and other crawling insects. Repeat after 4-6 hours or as needed.

GARDEN INSECTS: Adjust spray nozzle to a coarse spray and apply at the base of ornamentals to kill and repel crawling insects. Best if used as a preventative treatment before insects become a problem, but may be used for spot treatments or existing infestations.

Shake well before using. Treated surfaces may be slippery when wet. Avoid direct contact with eyes and plant foliage. Prior to treatment, test product in an inconspicuous area to test for possible staining or discoloration. Inspect area again after drying.

PREVENTION: This product presents no specific hazards when used as directed. We recommend that users avoid inhalation, ingestion, and contact with eyes and skin. Always use proper personal protective equipment (PPE). Do not use pressure to empty because container is not a pressure vessel.

RESPONSE: May cause temporary eye and skin irritation. May cause gastrointestinal tract irritation, if ingested. In case of contact with eyes, flush with plenty of water for 15 minutes, occasionally lifting lids. In case of contact with skin, wash area with soap and water. Get medical attention if eye or skin irritation persists. If ingested, drink 1 to 2 glasses of water to dilute, and get medical attention.

STORAGE: Store at temperatures below 120°F in a well-ventilated place, out of direct sunlight. Keep container tightly closed when not in use.

DISPOSAL: Dispose of contents/container to approved waste disposal plant in accordance with federal, state, and local regulations.

SPILLAGE: We suggest appropriate PPE be used for accidental spillage. Avoid spills and clean them up immediately when they occur. Product is slippery. Avoid accidental release of concentrate into sewers or water ways. Contain spill if possible. Absorb on mineral clay absorbent material. Shovel into DOT approved container for disposal.
